"TIME IS MONEY"

BENJAMIN FRANKLIN

HAND ENTERING ENTRIES

- Your time and your employee's time is money
- If you calculate on \$10/hr and it takes you an hour a week to input feed tickets, you are spending \$520 on just feed ticket entry
- Ensuring quality data. Humans make mistakes. If you estimate an hour a week for editing incorrect entries and double checking data entry that would be an additional \$520

IMPORTING DATA

- Average time to import data is 1 minute. A cost of \$8.32/year
- No human data entry = quality data. You might take a few minutes to review the transfer report so at 5 minutes a week for review that will cost \$41.60/year
- The initial cost of import modules is around \$1000.00 depending on the module, with an update cost around \$200 (or less depending on support package)
- First year cos difference of \$9.92
- Subsequent year savings of \$790.00
- Additional benefit of 50 hours you or your employee can be working on something else
